

Data Storytelling

FROM YOUR LIFE STORY TO BUSINESS DECISIONS

Hayam Wahdan | Feb 2026

Data storytelling bridges personal narratives with business insights,
transforming decision-making.

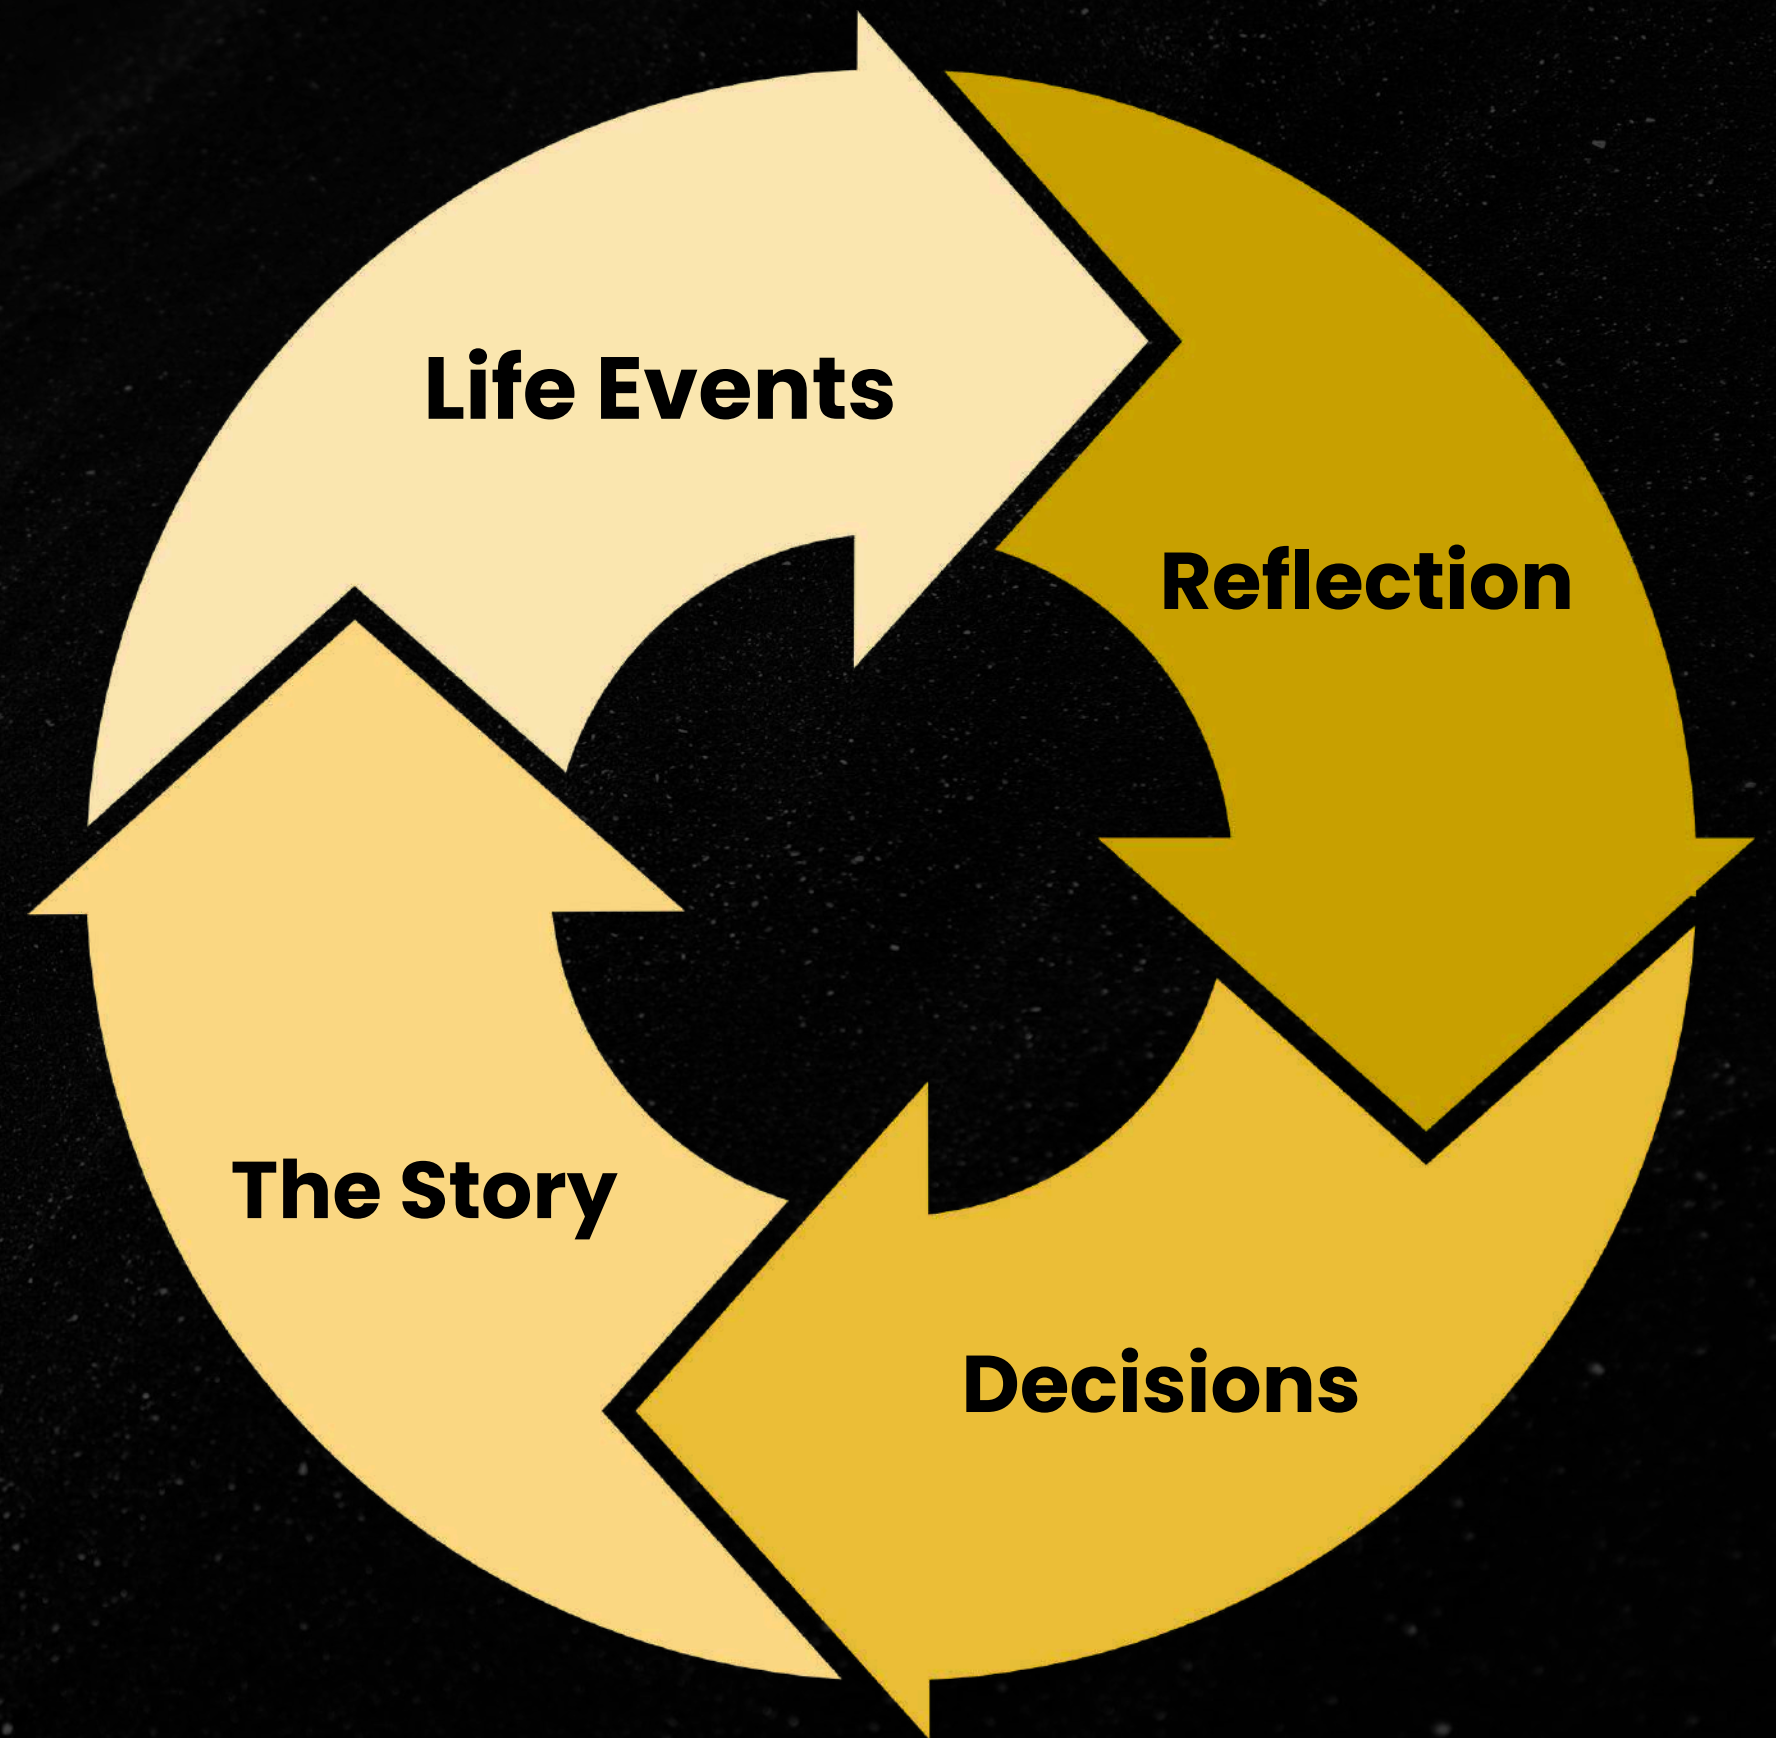

WHAT IS YOUR MOTTO?

Your motto originates from your personal data, experiences, and decisions.

THE HUMAN STORY CYCLE

We naturally process life into meaning, turning experiences into wisdom through a universal pattern. Businesses follow this exact journey, using data instead of memories to form their stories.

BUSINESSES ARE NO DIFFERENCE FROM NUMBERS TO NARRATIVE

Organizations, like individuals, use data reflection to guide their path forward. The fundamental process: turning raw information into meaningful action.

THE ANALYTICS MATURITY LADDER

Organizations climb through four distinct levels of insight sophistication, moving from hindsight to actionable strategy.

Descriptive

"What happened?"

Diagnostic

"Why did it happen?"

Predictive

"What will happen?"

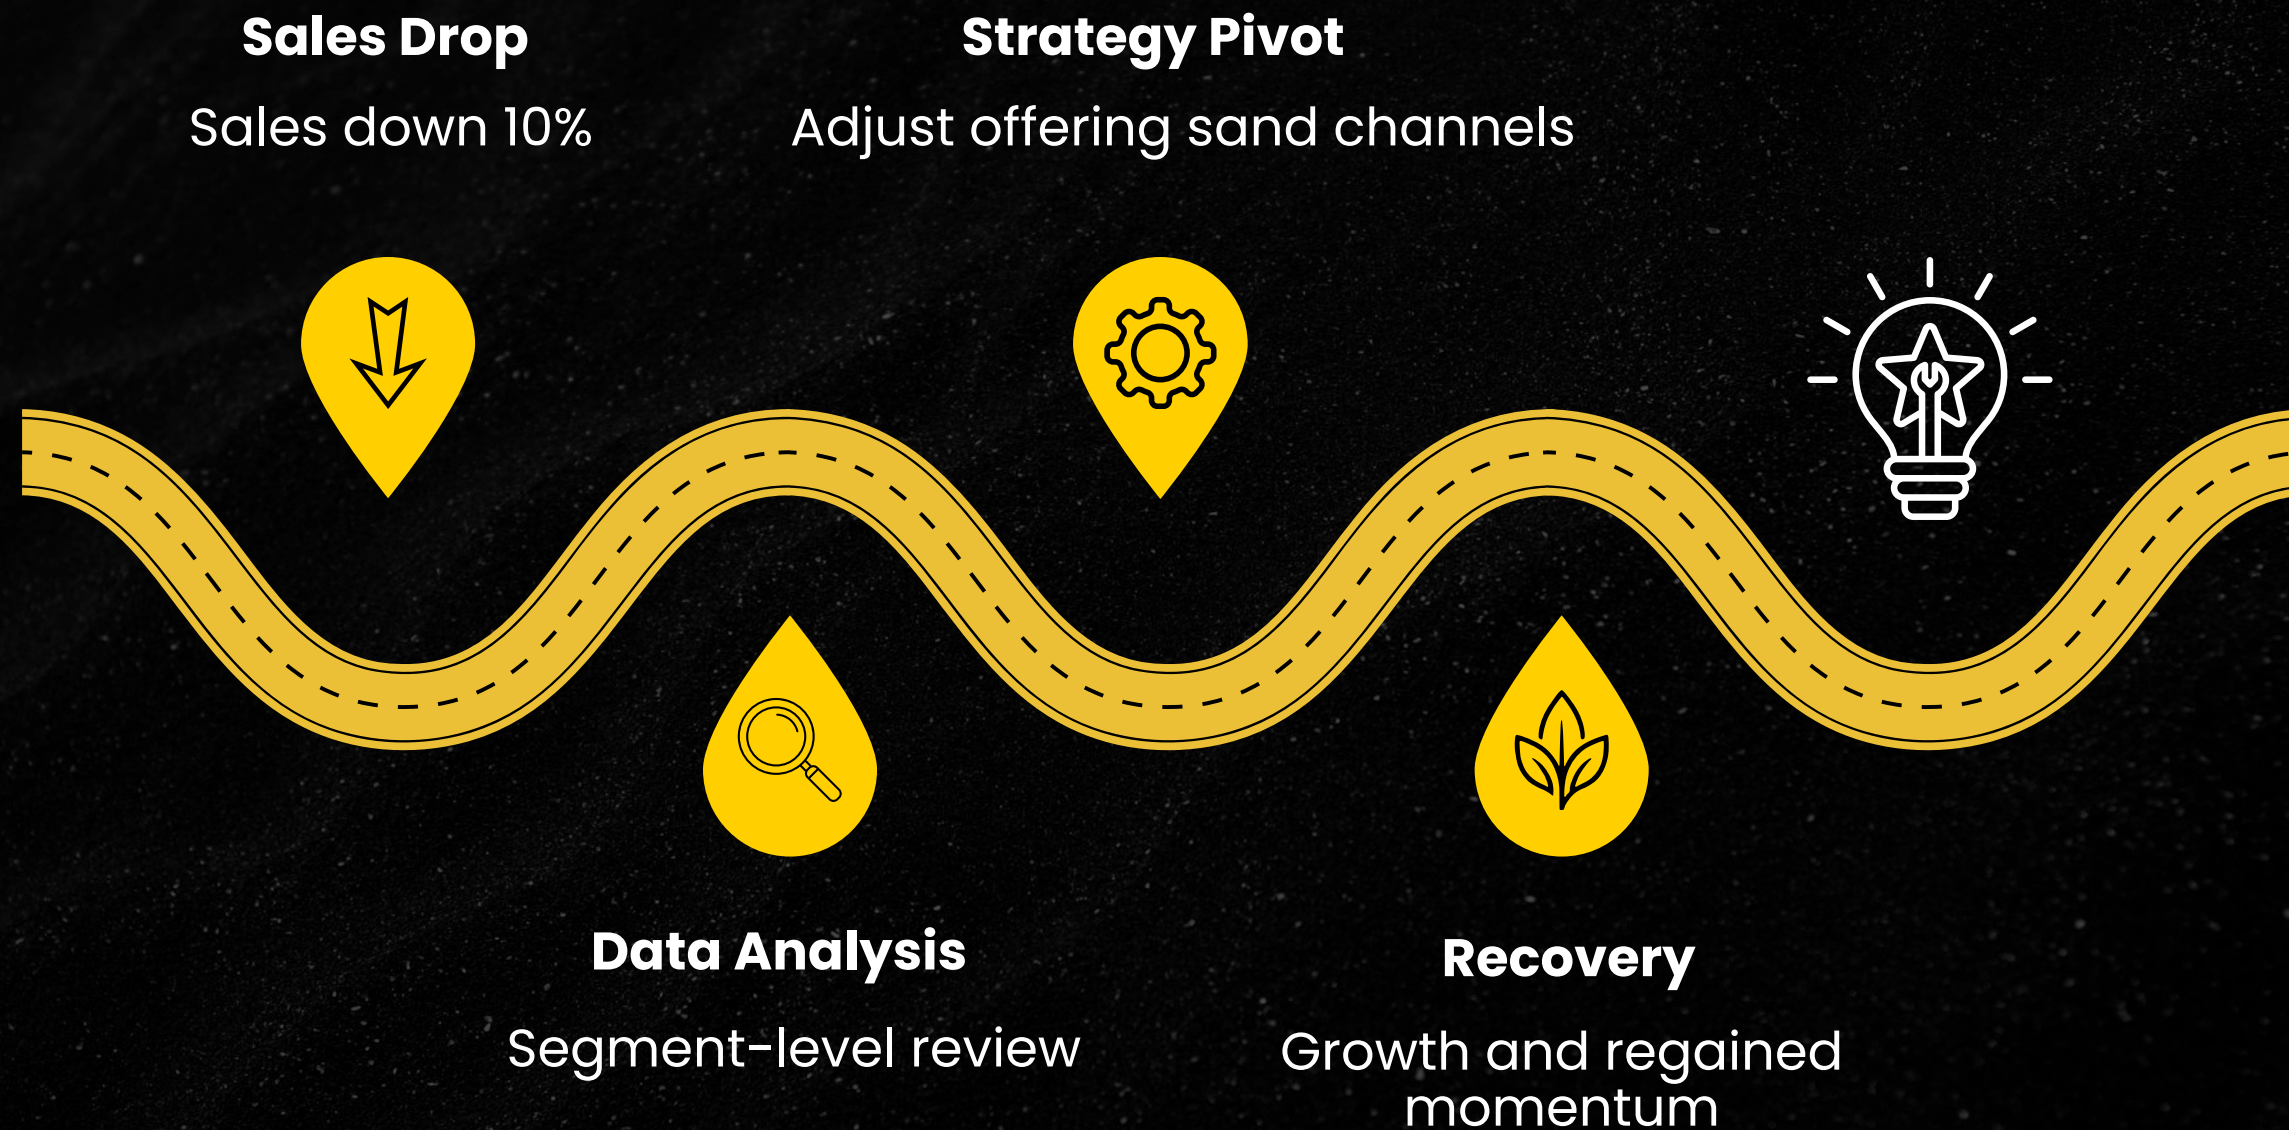

Prescriptive

"How can we make it happen?"

Prescriptive analytics, the highest level, doesn't just forecast the future; it actively shapes it with data-driven recommendations.

REAL-WORLD IMPACT: A RETAIL STORY

A retail business transformed crisis into opportunity through data storytelling.

Initial sales declines prompted deep analysis, revealing growing customer segments. By pivoting strategy, the retailer not only recovered but accelerated growth in profitable areas.

KNOW YOUR AUDIENCE

YOUR DATA STORYTELLING FRAMEWORK

Master this four-phase framework to transform information into clarity and action.

Data storytelling: applying life's sense-making process to better business decisions.

DATA STORYTELLING =
DATA + INSIGHT + ACTION + AUDIENCE

Final Message

**FACTS TELL,
STORIES SELL.
THANK YOU!**
